Economy, technology, does it really work?
The guy running the government's another jerk
Try to teach some values and they all erode away
You're lucky if they listen to a single word you say.

What is right and what is wrong, government decides
You don't have to like the laws as long as you abide
We're all being oppressed by the upper-middle class
The government you vote for is the one that you
possess.

I'm so tired and now I'm through, I'm through and so
are you
Oppressive fear from presidents, it's us, not the
government
We control the masses of the whole entire race
Soon our streets will all get filled without a happy face.
