The scientist purported that there aint no purpose  
And the theologian told me that it's all been designed  
And Im trying to maintain objectivity  
The world wont illuminate what really matters  
And Im an imperfect moral meaning extractor  
Processing the complexity  
Born of the earth (are we blind? )  
We werent given a choice (there's no way)  
What about free will? (what we have)  
Do we have a voice? (is shattered faith)  
See them run in place (here and now)  
In the human rat race (no reward)  
So much dead weight (no debate) to our disgrace  
(accept your fate)  
Life begins when you accept your fate  
Paralysis from forces raging out of control until  
My confidence and will are at an all-time low  
Just directionless wandering  
Eternal life, eternal truth, eternal secrets  
Isolated hopes and hypotheses just  
Leave me feeling so hungry  
Born of the earth (are we blind? )  
We werent given a choice (there's no way)  
What about free will? (what we have)  
Do we have a voice? (is shattered faith)  
See them run in place (here and now)  
In the human rat race (no reward)  
So much dead weight (no debate) to our disgrace  
(accept your fate)  
Life begins when you accept your fate  
Right or wrong,  
The main criterion is what you do and not what you say  
The roads you take, the friends you make and those  
you throw away  
The method is a simple synthesis of the past and  
present state  
You never lose if the path you choose is one you can  
easily navigate  
I had a dream, light and carefree  
But now there's doubt and gravity  
But I wont run in place (are we blind? ) in the human rat

race (there's no way)  
I can set the pace (what we have) and accept my fate  
(is shattered faith)  
Shattered faith (here and now)  
Shattered faith (no reward)  
The part of me (no debate) I can't erase (accept your  
fate)
