You thought you'd be  
The one they'd see  
You thought you'd shine  
A front page headline

But you were sinking like a stone  
Yeah you were sinking like a stone

On the decline  
I thought that you were fine  
How could've know where you were going?  
How could I have known?

They let you die  
Over and out  
They let you drown  
Sinking like a stone  
Yeah you were sinking like a stone  
Etc.

Headlights trying to find you  
All night trying to find you  
Slow down there's nothing behind you  
Over and out

They let you die  
Over and out  
They let you drown

They let you die  
They let you die
