### "Open Heart Surgery"

Visit "[Open Heart Surgery](#)" on [MotoLyrics.com](http://MotoLyrics.com)

I'll open up if you make an incision  
I'll do right by you  
All I ask is for your care and precision  
And maybe I could pull through  
You could have saved me if you'd only known better  
But you're so carelessly  
Took me apart and put me back together  
Open heart surgery

I was fine at first, now I assume the worst  
When I could overhear  
The repercussions of a sad discussion  
Another girl in tears  
I could have saved her if I'd only known better  
But you're so carelessly  
Took her apart and put her back together  
Open heart surgery

If girls like you and girls like me  
Are really a dime a dozen  
Then why are we in such a high demand  
My mother says it's just a shame  
You don't come around too often  
Even she's begun to understand

Just let me know  
What you are thinking  
I'll find a way to get along somehow  
Just let me go  
Don't leave me hanging  
Please don't fail me now  
Just take it slow  
Don't let me suffer  
I'm on a verge of an emergency  
But final blow  
Will make me tougher  
Until then you will always be a danger to me

We should have listened to our intuition  
But we knew all too well  
In addition to our suspicion

Only time could tell  
With friends like you I get confused  
Who needs enemies?  
We've been here too many times before  
Open heart surgery

If girls like you and girls like me  
Are really a dime a dozen  
Then why are we in such a high demand  
My mother says it's just a shame  
You don't come around too often  
Even she's begun to understand

Just let me know  
What you are thinking  
I'll find a way to get along somehow  
Just let me go  
Don't leave me hanging  
Oh please don't fail me now  
Just take it slow  
Don't let me suffer  
I'm on a verge of an emergency  
But final blow  
Will make me tougher  
Until then you will always be a danger to me  
A danger to me  
A danger to me  
A danger to me  
A danger to me
