Pillows and blankets
Cover your smile
But your look says it all
Your kiss said it all

And you can feel it
Oh, how you can feel it
It's bouncing right out of my chest
And you grab onto my soul

Will the world stop for just one second
While we lay here
Thinkin' how we're gonna make it
We'll get through this
Don't think for a second that we'll ever fall behind

Stop the clock
Don't look at your phone
We have the whole long day just to be alone
Will you stay and lay with me?
Oh, stay and lay with me

I got goosebumps and good news
Oh, I'm tellin' you how I'm crazy for you
Your dark, dark hair is tickling my chest
And the floor couldn't be a better place for your dress

You say I'm crazy. It's valid
You're oh so crazy, too. It's advanced
Tangled and true, I see right into you
And I grab onto your soul, too

Stop the clock
Don't look at your phone
We have the whole long day just to be alone
Will you stay and lay with me?
Oh, stay and lay with me

Oh, can't we take it one day at a time?
Will a ring on your finger finish the rhyme?
Will you stay and lay with me?
Oh, stay and lay with me

Will the world stop for just one second
While we lay here
Thinkin' how we're gonna make it
We'll get through this
Don't think for a second that we'll ever fall behind

Stop the clock
Don't look at your phone
We have the whole long day just to be alone
Will you stay and lay with me?
Oh, stay and lay with me

Oh, can't we take it one day at a time?
Will a ring on your finger finish the rhyme?
Will you stay and lay with me?
Oh, stay and lay with me

Whoa, ohh, ohh
Whoa, ohh, ohh
Whoa, ohh, ohh
Whoa, ohh, ohh
