There is the void known as despair  
A gateway upon an emptiness endless and vast

In despair the language of the shadows is intelligible  
In madness all sounds become articulate

Terror and despair they guide me  
Into nightmares that follow one upon the other

Like windblown grains of sand

[solo: Dallas]

I have become as the wastelands  
Of unending nothingness  
Now shall the night things  
Fill me with their whisperings  
And the shadows reveal their wisdom

[solo: Karl]
