Just another room, just another town  
Same old crazy people hanging around, still you shine  
silently

Staring into space, comin' down alone  
Feel like packin' all my bags and running home where  
you shine silently  
Shine silently, I don't need no light in the darkness  
Shine silently, no, I won't get lost while your loves  
shines, shines on me  
Shines on me

People at the door, people on the phone  
Same old story, no time on my own, still shine silently

Nothing left to say, nothing left to prove  
When it's said and done there's nothing left but you  
babe shining silently  
Shine silently, I don't need no light in the darkness  
Shine silently, no, I won't get lost while your loves  
shines, shines on me  
Shines on me
