Your wind blows, my heart bells chime  
I stay on my toes, you stay on my mind  
You weren't born to lose, you could let me win  
Only one way out, come further in

If you want to take me home, I'm yours to keep  
I'll close my eyes ,tell me where to sleep  
If you want to light up the night, we'll let everyone see  
The way that you voice activate me

Hope one day our love will come to this  
Not on a widescreen with a Hollywood kiss

But where every song on my playlist  
Is a song about you

Each time I fell I could never stand  
The way the street branded my hand  
You picked me up, went the extra mile  
Can I use my hands to make you smile?

Hope one day our love will come this way  
Not with chocolates or a red bouquet  
But where every song on my playlist  
Is a song about you
