Steal my eyes and I will see you through on this bitter
sweet journey

Take my hand and I will lead you to the so called end
Hold me tight and I'll forgive you for making me stay
Tell me lies and then I'll leave you, cause lies are made
of fear

You better be strong for me
I said you better be strong for me

Steal my eyes and I will see you through on this bitter
sweet journey
Take my hand and I will lead you to the so called end
Hold me tight and I'll forgive you for making me stay
Tell me lies and then I'll leave you, cause lies are made
of fear

You better be strong for me
I said you better be strong for me
I said you better be strong for me
You know you better be strong for me

Steal my eyes and I will see you through on this bitter
sweet journey
Take my hand and I will lead you to the so called end
Hold me tight and I'll forgive you for making me stay
Tell me lies and then I'll leave you, cause lies are made
of fear

You better be strong for me
I said you better be strong for me
You know you better be strong for me
I said you better be strong for me
I said you better be strong for me
Strong for me
Strong for me
I said you better be strong for me
You know you better be strong for me
I said you better be strong for me
