"Never Better"

Visit "[Never Better](#)" on MotoLyrics.com

Prevail, its high tide,
evil, regrets
winning lost
several lives, all dug down, bloodied conquest

try, feel, like one of us
your pulse will drown you into quicksand
we can always remember
but we cannot forget

god damn it are you ready (x2)
god damn it are you never, better, never
i will not let you feel this
never, better, never,
i will not let you have this now

so will you obey
when your kneeling over
kill us right now cause your never better

kill it
kill it with love

turning you wrong
become this all
deliver the dead
back down, we rise
we fucking rise (x4)

so you can see

kill it, feel it, we will stay, when you feel like one of us
(x2)
look up, tell me you wanted to go, wanted to feel like all
of us (x2)
like one of our own
like all of us
like one of our own

you will begin to love it
