In the seas, in earth, in the sky  
In the past, the present and future  
Up and down, left and right  
The warmest blaze and the coldest ice is you

Astronomicon  
You're my star  
Astronomicon  
Upside down

[Chorus:]  
Show me the way  
Lead me astray  
Crush my bones and burn my soul  
You are the strength in me  
So easy as 1,2,3  
With mysteries

You are the vicious, you are the delicious  
You are my wisdom and you are the way  
You are so bright and you are my light  
You'll find me even if I'm disguised

The bringer of light - the way outside

For eternity is here and now  
Endless with it's billion foes  
Look up! For the earth will be slain  
But the cosmos shall eternally remain

Believe in yourself, you can't be forsaken  
Receive only the facts and support the fall of fake  
Unlike wolves wander forever alone  
Follow my star you cannot be betrayed

You are of everything  
Show me the way  
You are my everything  
Show me the way  
Where nothing is everything
