Wake me up before you leave
I've got an interview today
I wanna job so don't forget to lend me
Some for train

I'm growing up to be a better man
But I always fail I'm still a dirty bug
I wanna grab the flag
But there's always someone faster

I'm trying to live a bit seriously
But what's on my mind is you know always girls
Vitaminize me
Pass me the potato chips

You know what
When nothing's going right
You know what
It's like a magic thing

I got the music playing loud in my head
I got a red hot chili blows it away
I got the music playing loud in my head
Turn the blinker off we go straight ahead

I'm going down like 20 limes a day
It could be less or maybe the same as you
And I'm floating up more than
A million times a day

I'm trying to live a bit cautiously
But what's on my mind is always having fun
I know nicotine kills
But quitting smoking kills me now

You know what
When nothing's going right
You know what
It's like a magic thing

I got the music playing loud in my head

I got a red hot chili blows it away
I got the music playing loud in my head
Turn the blinker off we go straight ahead

As always things won't be better
As always no one understands
As always I'll do anything
As always if it makes you laugh

I'm growing up to be a better man
But I always fail I'm still a dirty bug
I wanna grab the flag
But there's always someone faster

I got the music playing loud in my head
I got a red hot chili blows it away
I got the music playing loud in my head
Turn the blinker off we go straight ahead

I got the music playing loud in my head
I got a red hot chili blows it away
I got the music playing loud in my head
Turn the blinker off we are heading ahead
