This wasn't it's supposed to be  
I went from having fun, to having fantasies  
And I had every chance to get you away from me,  
But now I'm just coming back like a...  
And I love it, now you're everything!  
Tried to lie and told myself that you ain't anything,  
But I'm in your bed with my phone off,  
Should be at the door, but I doze off  
When I know I should be leaving,  
But I can't control how I'm feeling, girl!

Chorus:  
I messed up, I started to care,  
Wish I could leave her right after we finished  
But I stay in it!  
I messed up, I fell in love with her  
Not what I wanted, or need it,  
But found it now, try to lose it,  
I messed up, I messed up, yeah!  
Never get it occurred to me  
That one night of passion could  
Ever lead to you being the one for me.  
Can't believe I let you get close to me  
I'm out of my mind to ever think I could keep this up  
With out getting caught up with the reality  
Tryina lie and tell myself you don't mean anything,  
But I'm in your bed with my clothes off,  
She put a condom on, but we go rough  
And I know I might be tripping,  
But I can't ignore how you're? feeling, hey

Chorus:  
I messed up, I started to care,  
Wish I could leave her right after we finished  
But I stay in it!  
I messed up, I fell in love with her  
Not what I wanted, or need it,  
But found it now, tryin to lose it,  
I messed up, I messed up, yeah!
