feat. Joe Budden

[Hook]

You're gonna miss me girl
In the way we were making love
You think he is me girl
The other just faking us
Don't have pretend that you love him that way
Like you walk in, come home with that thought I say

Cause we got too many first
Drinking through too many words
And you always said I was the truth
But why were you surprised
That I began to hurt
And I ain't let you go just to be in love
Throwing money on a stripper
And just because I'm gone you ain't gotta look for love
Just pretend the other nigga
We are like beautiful waterfall, nothing random, yeah,
yeah
Now that your man gone, you ain't got a leg to stand on

[Hook]

You're gonna miss me girl
In the way we were making love
You think he is me girl
The other just faking us
Don't have pretend that you love him that way
Like you walk in, come home with that thought I say
Cause ain't nobody ever gonna do you like I did you girl
Cause ain't nobody ever gonna kiss you like I kissed
your girl
And nobody gonna touch you like, I touched you girl,
girl
Ain't nobody ever gonna fuck you like, I fucked you girl,
girl

When you had my love you ain't do right
Shine, let it burn, but it won't light
Step in the dark soon enough shine

I know that love ...once, just let it go
And I aint let you go just to be in love
Throwing money on a stripper
And I aint let you go just so you can be a hoe
And go fuck another nigga
We are like beautiful waterfall, nothing random, yeah,
yeah
Now that your man gone, you aint got a leg to stand on

[Hook]

Youre gonna miss me girl
In the way we were making love
You think he is me girl
The other just faking us
Dont have pretend that you love him that way
Like you walk in, come home with that thought I say
Cause aint nobody ever gonna do you like I did you girl
Cause aint nobody ever gonna kiss you like I kissed
your girl
And nobody gonna touch you like, I touched you girl,
girl
Aint nobody ever gonna fuck you like, I fucked you girl,
girl

Im dealing with the past presently
Maybe that ass was that heavenly
I always thought that wed last till I was 17
Before I knew that whenever Id spazz you wouldnt let it
be
And I dont care if everything he do is brand new
Known him for some months, so could he really
understand you
Maybe we both got tired of being mishandled
Then when we tried to fix it all is when weve lost the
chance to
Showing with this new bitch, trying get the take to me
The greatest part about her not being you is the new
slave to me
Your would just smuck nigga, fairy tale make believe
But you so confused, I dont know who you tryina make
believe
Maybe you just needed a break from me
Or maybe you cant tell exactly how bad is breaking me
Or do you want anybody that you can give your all
Its so bad sometimes when Im alone, I relive it all
Walk in, pick it up, throw you on the bed now
Suckin on your nipples, till you want a little head now
Mad don sex, Ive seen this wasting up the stairs
When crazy anytime I let my face be your chair
Its like a neverending dream, neverending screams
Getting wetter with every stroke, its like a neverending

streams
Switch it up, knees wear apart, hands upon the
headboard
Couldnt sing for shit, but that dig would make her hit
every chord
But do you miss a nigga sometimes
Just the thought of that question is kinda wrong to me
And if so, then we should fuck again, just one time
Dont try to fight, you know that pussy still belong
You be running from the dick, I pull you closer
Make your run back
Can you picture a scenario when you would come back
But when I ask, its like you never got a come back
Which only forces me to think that you dont really want
that

[Hook]

Youre gonna miss me girl
In the way we were making love
You think he is me girl
The other just faking us
Dont have pretend that you love him that way
Like you walk in, come home with that thought I say
Cause aint nobody ever gonna do you like I did you girl
Cause aint nobody ever gonna kiss you like I kissed
your girl
And nobody gonna touch you like, I touched you girl,
girl
Aint nobody ever gonna fuck you like, I fucked you girl,
girl.
