I hope you listen now
Wherever you are
I hope my words will fly
And get to you far away from here

Coz you're all my life
All I wish to find
All I ever really wanted and more
But I should have told you before
The magic was gone

My days were always bright
When you were around
My heart was filled with life
And music of love was in my ears (yeah)

Coz you're all my life
All I wish to find
All I ever really wanted and more
But I should have told you before
The magic had gone

Chorus:
You're my heart
You're my love
You're my everything
You're the air that I breathe
You're the songs that I sing
I don't know why I let you walk out of my heart
I can't live without you no more
But I should have told you before the magic had gone

So if you hear me cry
Please come awake
And shape this lonely heart
Take fear away from me (oh yeah)

Coz you're all my life
All I wish to find
All I ever really wanted and more
But I should have told you before

The magic had gone

Chorus:

You're my heart
You're my love
You're my everything
You're the air that I breathe
You're the songs that I sing
I don't why I let you walk out of my heart
I can't live without you no more
But I should have told you before
The magic had gone

Bridge:

Time will fly
Our love will fade away
Everything we had might disappear
But I won't let
I won't let it go
Just hide it in my heart
Save it here

Chorus:

You're my heart
You're my love
You're my everything
You're the air that I breathe
You're the songs that I sing
I don't know why I let you walk out of my heart
I can't live without you no more
But I should have told you before
The magic had gone
The magic had gone...
