### Verse 1

24 hours have drifted since the last time you came by  
still you send lingers images vivid of what we did last  
night our hearts were pounding in the moment your  
warmth still felt in my bed waiting for you to come  
through the door again so you can take me away

### Chorus

to that special place only you(you you)  
can take me away  
to that special place only you(you you)  
only you only you can take me away to that special  
place  
only you you can take me away (can take me away)

### verse 2

..from the heavens the day entered my life more than a  
lover my best friend the cure to my longing inside, i  
start to miss you from the moment...anticipating you to  
come through the door to take me on that flight

### Chorus

Only you can take me away  
to that special place only you  
only you only you can take me away(way way)  
only you, Only you can take me away
