bound and gagged and tied to a chair  
place you in the corner, you can watch from there  
gonna dish some dirt and the dirt's going deep  
i'll give her what she wants and you, memories to keep

witness this, my mute witness  
remember this, my mute witness  
picture this, my mute witness  
got a sting in my kiss, my mute witness

once i've done your sister, i'm gonna do you  
let you feel first hand what you've watched her go  
through

she likes it rough so you better be prepared  
tie your long black mane back so, your vision's not  
impaired

her face in the pillow, i grind her tail bone  
her neck in a strangle hold, i find my way 'home'  
she reels, she squeals  
who knows what she feels, who knows what she feels

now you've seen how it works, it's time to learn more  
your sisters' passed out and curled up on the floor  
cut you loose for a moment, throw you on the bed  
visions of what's coming, shift round in your head
