

Gypsy And The Cat

"Parallel Universe"

Visit "[Parallel Universe](#)" on [MotoLyrics.com](#)

We've travelled so far, your eyes won't see
Playing hide and seek, the backdrops, the stars and the sky
Remember the first time you met me, we were frozen
The voyage of time captured our hearts and set us free

You're so far away
You're so far away

One day I'll find the words to say
We're moving in motion a star is born, it's a sign
We can only hope we won't get lost, in a black hole
I wish that you could throw me a light
Together we'll be.

You're so far away
You're so far away
You're so far away
You're so far away

And we're floating in space
And we're floating in space
And we're floating in space
And we're floating in space
And we're floating in space
And we're floating in space

(You're so far away)
It's a parallel universe
And it seems so far away
It's a parallel universe
And we'll meet somewhere half way
