Verse 1

I could lay here and drift away
I could lose it all in a day
And I feel very comfortable on my way
Yet sometimes it feels a lot like a dream
I could save you I'll be brave
I got these feelings I can't explain
And I'd rather burnout than fade away
And sometimes I feel like I wanna scream

Pre-chorus

We're caught in the sunshine looking for shade
I never thought it would be this way
We're falling upwards nothing can slow me down

Chorus

I love the way that things are come and go as I please
And when this life stresses me out
I disappear without a trace for a few days
Just to clear my mind
It's the only life that I know
It's the only life that I know

Verse 2

I adore you in every way
I know that sometimes it's hard to say
But I've never loved you more than today
And without you I feel like I couldn't breathe

Pre-chorus

We're caught in the sunshine looking for shade
I never thought it would be this way
We're falling upwards nothing can slow me down

Chorus

I love the way that things are come and go as I please
And when this life stresses me out
I disappear without a trace for a few days
Just to clear my mind
It's the only life that I know
It's the only life that I know
