your headphones sit alone
the dog waits by the door
no one calls on the phone
or comes over no more

i'll be waiting here for you
when you're gone I don't know what to do
oh my god just take me with you

when you're young they all say
you'll meet a man some day
he'll love you, he'll take you
some where far away

they never said that he would leave
how could I have been so na've

now you're gone I can hardly breathe

I need you here with me
i'm in pain and i'm in need
tongue dumb and eyes can't see
I need you here with me

fold me, put me
in your pocket
somewhere where I know you're near
put your picture in my locket
i'll be waiting for years and years

I need you here with me
i'm in pain and i'm in need
tongue dumb and eyes can't see
I need you here with me
