"Choices"

Visit "[Choices](#)" on MotoLyrics.com

For the first time in history
Our planet is threatened by humans and our behavior
To such an extent that the climate
The habitat, and evolution itself may change forever

We're faced with choices
Choices that will affect all of our lives
The lives of our offspring and those to come.

We're faced with choices
Choices that will affect all of our lives
The lives of our offspring and those to come.

For the first time in history
Our planet is threatened by humans and our behavior
To such an extent that the climate
The habitat, and evolution itself may change forever

We're faced with choices
Choices that will affect all of our lives
The lives of our offspring and those to come.
