"Something Goes Right"

Visit "[Something Goes Right](#)" on MotoLyrics.com

Yeah, Something goes right,
Yeah, something goes right,
Yeah something goes right
and you're hoping that it goes right, that it goes right,
that it goes right oh

You wouldn't even know, you wouldn't even care,
you wouldn't even know, you wouldn't even care
I've been there though, I've been there though, I've
been there though-oh.

Standing in a dream world, sitting next to you, up in the
clouds, up up in the clouds, up up in the clouds
Sitting on the edge, looking down at the earth
Looking up into space, up up into space, up up into
space

(Chorus) Is it better to let you go?
Or is it better to let you know?
You should t-t-t-take it, you should t-t-t-take it back

Is it better to let you go?
Or is it better to let you know?
You should t-t-t-take it, you should t-t-t-take it back

I've only got myself self self to blame
Love something thinking things will never change
These feelings probably will still still remain, I was
always hurt

& I've been feeling like this most most of my life woah
I've been feeling like things aint gonna change
Things aint gonna get it back?

(chorus)

I keep on having these conversations & p-p-p-praying
I keep on staring at these constellations & p p p praying
and these bitter thoughts that keep on escaping
I wish that they were staying and something would go
right and something will go right, go right

Dont you bring me down. Dont you bring me down. Dont
you bring me down.

(Chorus)

Yeah, something goes right,
Yeah something goes right
and you're hoping that it goes right, that it goes right,
that it goes right oh

You wouldn't even know, you wouldn't even care,
you wouldn't even know, you wouldn't even care
I've been there though, I've been there though, I've
been there though-oh.

Standing in a dream world, sitting next to you, up in the
clouds, up up in the clouds, up up in the clouds
Sitting on the edge, looking down at the earth
Up into space, up up into space, up up into space
