### "Love On And On"

I can feel my heart is fallin, cause it's never felt this true

In your eyes I can see forever, like the stars above

We got a lifetime to share together, one night is not enough

Chorus:

I wanna love on & on & on with you

I wanna make everytime just like brand new

I wanna love on & on & on & on with you YES I DO!

There's a dream that we can follow, to last the whole life through

Hand in hand we'll embrace tomorrow, Baby we can touch the moon

Every step that we take, will lead us, like footprints in the sand

To the shore of a blue oasis, in a distant land

Back to chorus 2x

Bridge:

I'm never gonna let you go, I'm always gonna let you know

That your the lifeline that turned my heart around

We're livin in the hands of faith, so baby why should we wait
