By the way I really love you  
Just in case you didn't know  
And I know baby it's not easy  
For you to say I'm the one  
But I can tell by the way you love  
By the way you smile  
By the way you say nothin'  
I can see it all in your eyes

By the way I really need you  
Everyday of my life  
Don't worry baby if words escape you

I feel what you're feelin' and that's enough  
I can tell by the way you love

By the way you smile  
By the way you say nothin'  
I can see it all in your eyes  
By the way I know it's not easy  
For you to say I'm the one  
But I can tell by the way you love me  
I can tell I'm the one by the way you love me
