Intro

This is Captain T6

Preparing for lift off

In 5, 4, 3, 2, 1... and were off

Let me explore you like Jupiter

I make a good Astronomer

Could you imagine what you do to her

Keeps me afloat Like Jupiter

Powerful like thunder

It's a myth that makes ya wonder

Goin n goooiin - harmony

Goin n goooiin - harmony

10, 9, 8... lift off

We're taking a trip into space

In our own world, own skin

Imagine us two

And gravity

I wanna explore your body from head to toe

Finding your special place

Your spot

Where only I can get you going

Our bodies are in motion

Like a genie I've got a love potion

We let out our emotions

As were slowly floating around

As we close our eyes

We float in the air, in and around our love

Upside down

Round and round

Our bodies intertwine

Fits perfect like a glove

Hook

A Magnetic force

Opposites attracting

Starting from your lips, then slowly kissing down your chest

Love seeing your reaction
Orbiting around you like the sun (I make it hot)
Your temperature rising
Each time I switch it up - I get it up
I make it more surprising
Enticing
Appetizing
I put the icing (you put the icing)
On the cake... (on my cake)

As we close our eyes
We float in the air, in and around our love
Upside down
Round and round
Our bodies intertwine
Fits perfect like a glove

Hook

We've landed
We can't get
Enough
This voyage
Enjoying
Every single second of every minute of the hr

Hook
