Lay you down
It's time to get freak boy no ones around
Can you lay me down
I love it when you make that sound
Lay you down
It's time to get freak boy no ones around
Can you lay me down
He loves it when i make that sound

Rose on the bed
Candles everywhere
He whispers in my ear
Baby can we take it there
Tonight is a mystery
Ima give you all of me
So lucky im with you and i got you next to me

Love it how you break it down everytime you on me
Boy o my o my o my o my
He got control of me
You keep it so sexy
Baby i can dig it im wit it baby do what you please

Lay you down
It's time to get freak boy no ones around
Can you lay me down
I love it when you make that sound
Lay you down
It's time to get freak boy no ones around
Can you lay me down
He loves it when i make that sound

(dutch new york verse)
She be calling me at work
Telling me she want me home
Fresh up out the shower powder
Yea she threw her vickies on
Baby girl is all i need
She know what i came to see
She know ima have her chasing waterfalls like tlc
Let's pour the rose around
She know i don't play around

She goin scream my name later
She don't have to say it now
Tell ya friends don't stay around
Dutchy bout to take it down
I know my whole way around you
Know can i

Lay you down
It's time to get freak boy no ones around
Can you lay me down
I love it when you make that sound
Lay you down
It's time to get freak boy no ones around
Can you lay me down
He loves it when i make that sound

Endless love
Tonight our hearts melt
Melt as one

If you only kniew whats going through my mind
As our bodies collide
Hold me
As you lay me down

Lay you down
It's time to get freak boy no ones around
Can you lay me down
I love it when you make that sound
Lay you down
It's time to get freak boy no ones around
Can you lay me down
He loves it when i make that sound

Lay you down
It's time to get freak boy no ones around
Can you lay me down
I love it when you make that sound
Lay you down
It's time to get freak boy no ones around
Can you lay me down
He loves it when i make that sound
