Yesterday oh how many do you wish you could relive  
Turn the page and go back oh I wonder what you'd give  
Looking back does it seem when you've planned when  
you've dreamed  
You forgot the most important thing  
Smell the flowers while the roses bloom take the time  
my friend and sing a happy tune  
Oh how precious every mile so take a minute learn to  
smile  
My friend let's stop a while and smell the flowers (smell  
the flowers)  
[ guitar ]  
Got a troubled mind friend if you let too much worry  
rule your days  
When you look back do you feel like something  
precious slipped away  
Oh my friend are you the man that the world slip  
through his hands  
Can you remember when you smelled the flowers  
Smell the flowers...  
Smell the flowers...
