(R.J. Johnson/Johnston)

how many moons from now is hard to say
but don't let it hold you back
cause this night has come to pass
and we'll be thinking bout this or that
tomorrow holds the hands that are reaching out for
little moments
and maybe we'll be the ones reaching out
and stepping out into the starlight
from the heavens
let it find us where we are
starlight falling all around us
could the heavens be very far
far far and away for me to say
that time shouldn't hold you back
cuz I can see the winds of change
got you shaking like a maple leaf
and maybe I'll be the one crying out
like some kid brother
Maybe I'll be the one who's all wet now
but I'll be shaking like a river dog
and stepping out into the starlight
from the heavens
let it find us where we are
starlight falling all around us
could the heavens be very far
maybe I'll be the one who shines
tomorrow comes and heaven knows
maybe I'll be the one reaching out
starlight
from the heavens
let it find us where we are
starlight falling all around us
could the heavens be very far
starlight, starlight falling
starlight falling all around us
could the heavens be very far
