(Instrumental)

And I'm scream it
As I call out your name
And were falling
The waiting drove you mad
Feel my heart beat out of time
And the lies will guide you home

And girl to hide it all
To hide it all
You've got to hide it all
And girl to hide it all, to hide it all
You've come to hide it all

But you're drifting away
I can't sleep at night
And your father been before

And you have disappeared
And your past has turned into grey
And the lies will guide you home

And girl to hide it all
Too hide it all.
You've got to hide it all
And girl to hide it all. Too hide it all
You've come to hide it all

(Instrumental)

Too hide it all
Too hide it all
You come to hide it all (you've got to hide it all)
And girl to hide it all, to hide it all
You come to hide it all

(Instrumental)
