"About Us"

Visit "[About Us](#)" on MotoLyrics.com

Straight off that I've been facing
Nascar my minds spinning racing
Would you be my girl?
Can I change your world?
Tell me what do u think about us
Would you think about us
Cause lately I've been think about
You and me, Me and you
And what will be to me
Would you think about us

So you've been coming up a little too strong
I've been thinking about you for so long
We were just having fun
Now you're the three three two two one for me
You're the only girl in my mind
You're the only girl in my bed
Girl, You read my head
Now you gotta tell me what were you thinking

I can read you like a book
I can tell how you feel by the way you look

Straight off that I've been facing
Nascar my minds spinning racing
Would you be my girl?
Can I change your world?
Tell me what do you think about us
Would you think about us
Cause lately I've been think about
You and me, Me and you
And what will be to me
Would you think about us

Damn! Girl you make me nervous
I know you're heart
And I know you deserve these

I deserve you too
I've been waiting so long for something so good
Everytime I look you in the eyes
I wanna make you feel beautiful

I wanna make you feel wonderful kind
I wanna keep you in my mind

I can read you like a book
I can tell how you feel by the way u look

Straight off that I've been facing
Nascar my minds spinning racing
Would you be my girl?
Can I change your world?
Tell me what do u think about us
Would you think about us
Cause lately I've been think about
You and me, Me and you
And what will be to me
Would you think about us

Would you think about us
Would you think about it, do you?
Just say the world , make a count
Every sense be first kiss to know what'd likes about
Every second is a moment we wish
Every moment is a pressure damn I nervous so I can
take

Straight off that I've been facing
Nascar my minds spinning racing
Would you be my girl?
Can I change your world?
Tell me what do you think about us
Would you think about us
Cause lately I've been think about
You and me, Me and you
And what will be to me
Would you think about us
