You see me walk
You see me fall
You touch the tears
Upon my face

I think there's going to be a backlash against
technology
You know, I don't know what's gonna cause it
I hope it won't be any environmental disaster shit
You know, for sure for my kids that wanna live a better
life
Not so much materially but I want a peaceful life

You know sometimes it's good just to go in the woods
And just go hiking and get back in touch with yourself
and nature
You know, then you come back here and you realize
that
This is like Ludacris all this emphasis on technology

50 different Internet devices and shit and Internet
devices
You can put in your pocket sometimes I feel threatened
by it
But you know, that's the future and I am a man of the
past
You know, I'm a, I'm a low tech man in a high tech world

I mean it's fact man I'm a low tech man in a high tech
world
There ain't shit I can do about it because you know
The world's changing and I'm not and you know
Maybe I don't wanna change you know maybe the
people
I associate with are like me you know

What's going on we can't use our brains
It's being a person you know
It's being a fucking person man
