You didn't think about anyone else  
You didn't think about any of us  
When you left that place  
You didn't want to go anywhere else  
Nothing could satisfy you till you left  
So you went away

Where did you go?  
Where are you now?  
I ask about  
So many of my friends  
Oh, about their ends  
What about us?  
Are we just dust  
On the floor again

I thought we were on the mend

You really put me in a quite a position  
You got me struggling as a musician  
With the song  
You like to write about all of your problems  
The damning songs because you think it was often  
But you're wrong

Why did you go?  
I guess I know  
Maybe my question is  
Why must I come to this?  
You talk about  
Being strong, yeah  
How I want to be  
You and your melody

Trying to learn about something important  
You keep taking up space, you're annoying

But I love you so  
Yeah, you already know  
They're trying to teach me about new ways of living  
They're trying to teach me about ways of forgiving  
But you make it hard  
You're such a bad, bad boy

I love you anyway  
No matter what what they say  
You were not approved  
But you are on the moon  
I care about  
How this turns out  
It's just more than I  
Heaven know how to fight  
I guess I want  
Tell me I have to  
Tell me I have to  
I know you couldn't  
I said I know you could  
Where are you now?  
I ask about
