Keep the level low, keep the level, keep the level low

Silly things can make you lose your mind
Just come back down and you'll see what you'll find
Life is often lighter than we make it
Than we make it yeah
Silly things can make you lose your mind
Just come back down and you'll see what you'll find
Life is often lighter than we make it
Than we make it yeah

Sometimes we often sing songs that make us happy
And we laugh so hard we even cry
It's the little things in life that evoke the pain deep
inside

Do you know what it means to say hi
To someone who don't keep things light

Silly things can make you lose your mind
Just come back down and you'll be surprised to find
Life is often lighter than we make it
So slow things down and just

Keep the level low, low, low, low
Keep the level low, low, low, low

Keep the level low

Silly things can make you lose your mind
Just come back down and you'll see what you'll find
Life is often lighter than we make it
Than we make it yeah
Silly things can make you lose your mind
Just come back down and you'll see what you'll find
Life is often lighter than we make it

Than we make it yeah

Silly things can make you lose your mind
Just come back down and you'll be surprised to find
Life is often lighter than we make it

So slow things down and just

Keep the level low, low, low, low
Keep the level low, low, low, low

Keep the level low

Do you know what it means to say hi
To someone who don't keep things light

Oh, oh, oh

Silly things can make you lose your mind
Just come back down and you'll be surprised to find
Life is often lighter than we make it
So slow things down and just

Keep the level low, low, low, low
Keep the level low, low, low, low

Keep the level low

Silly things can make you lose your mind
Just come back down and you'll be surprised to find
Life is often lighter than we make it
So slow things down and just

Keep the level low, low, low, low
Keep the level low, low, low, low

Keep the level low
