lost you under my bed

hid and over your head
moved away from our town
ask me what has been found
but don't tell me nothing

won't tell you nothing
i know there's something out there
someone who i can take care
don't tell me

don't tell me
stars and moon are up late
sun is sealing their fate
time to let out a sigh

sweet, sweet child will always ask why
so don't tell her nothing

she won't tell you anything

she knows that something's out there
someone that she can take care
don't tell her
don't tell her
i thought you knew, i thought
i thought you knew, i thought

i thought you knew

i thought you knew
i thought you knew, i thought
i thought you knew, i thought
i thought you knew

i thought you knew
