We can meet under the starlight
In our bare feet catch a firefly
In a world where angels are falling
It's as perfect as a night's gonna be
You see...

Hold my hand for way too long
All my plans just take too long
Wanna stay here right beside you
People say that love will find you
It will

Here in the starlight we all have the right to dream
Here in the starlight where love is the way that it
seems...

Let the breeze blow back your hair
Climb a tree without a care

In a world of dirt and glitter
You've been hurt but you don't seem bitter at all

Found a place that's in my heart
Can't replace it if we parted
Wanna stay right here forever
Wanna face the night together with you...

Here in the starlight we all have the right to dream
Here in the starlight where love is the way that it
seems...

We can meet under the starlight
In our bare feet catch a firefly
In a world where angels are falling
It's as perfect as a night's gonna be

Here in the starlight we all have the right to dream
Here in the starlight where love is the way that it
seems...
