Closing in, these four walls keep closing in  
How can I get out  
Seems too late, I'm hanging on a thread what was love  
Is hate  
Burned by your betrayal  
How many times did you do this to me  
With your cold cold daggers you making me bleed

You never gonna let me down  
You never gonna let me down  
You never gonna let me down again

Burns away a small white cloud on a sunny day  
Nothing left but a memory there somewhere  
How many times did you do this to me  
With your cold cold daggers you making me bleed

You never gonna let me down  
You never gonna let me down  
You never gonna let me down again

You never gonna let me down  
You never gonna let me down  
You never gonna let me down again

You never gonna let me down  
You never gonna let me down  
You never gonna let me down again

You never gonna let me down  
You never gonna let me down  
You never gonna let me down again

You never gonna let me down  
You never gonna let me down  
You never gonna let me down again
