I see the men out at sea  
Next to the window, I shine the light  
Come now and enter the heavens  
Take the ship on full speed  
Use your strength and use the light  
Old man on board, bring them to safety

Wind all around me  
The danger keeps on crawling  
The waves are falling  
Atmosphere watching close  
Ghosts of the north shore  
We are close to the lighthouse

You're not so far out at sea  
The shoreline is double speed  
From the center of the wheel  
Spaces are now filled  
We've found we are okay

Far from the night and from the dark

Wind all around me  
The danger keeps on crawling  
The waves are falling  
Atmosphere watching close  
Ghosts of the north shore  
We are close to the lighthouse

Dear god, White Saint  
Do you remember me?  
I've kept my promise  
On who I'll never be

Does the ship take shipwreck  
To the bottom of the sea  
I'm tired of losing front wars  
On who I've never seen

Banishing tree what has thou bring?
