Yeah, I said a lot would change before it all happened  
People didn't believe till it all happened  
Now I'm runnin round these cities getting busy  
With these women, best believe that's it all pace  
Watch the doubters turn believers

Yeah, now turn me louder in their speakers  
Ah, hold out my hand with a smile  
Cause these haters ain't haters  
They just fans in denial  
I swear, and she understand it's all love  
Minor league but one pitch away from being called up  
And she say she wanna come with me  
But baby there's no room for company

[Hook]  
I live for this feeling baby  
No need to feel worried about us  
We out here tryna get paid  
No need for us to worry bout love  
Comin from the night until the sun is up  
Party like a rockstar, double cups  
There ain't another crew that could fuck with us  
You know who leaving with, come with us

I'm a young king, this is how we roll  
Living on the road, rockin all these shows  
I'm a young king, same old flow  
I do it like the pros with the whole team on  
I'm a young, young, young, young king (x2)

Hollywood hills, we overlooking town  
Bottle crisp with a model chick  
With a crooked smile  
Now, I'm sittin and reminiscin bout when I started to spittin  
And they wouldn't listen but look at now  
Yeah, work hard till the sun up  
Being turned down is just apart of the come up  
I know, taking these meetings, we universal  
I spend my nights on the stage but do it like its

rehearsal  
I swear, Ex-Girl on the speaker phone  
Asking me whenss the next time I'ma be at home  
But baby you don't really don't wanna see me  
Cause I fell in love with fucking these bitches that love  
my CD  
Fo real

[Hook]
