"Science"

Visit "[Science](#)" on MotoLyrics.com

Sins and saints
White black and shades of grey
Some things you can't explain
But I'll keep you safe

Numbers don't apply
When we're in wild like lions
It's gone on long enough
Nothing's adding up with science

Hold on tight
Wait till the stars ignite
And when the world's on fire
I'll be by your side

Numbers don't apply
When we're in wild like lions
It's gone on long enough
Nothing's adding up with science

Hold on tight
Wait till the stars ignite
And when the world's on fire
I'll be by your side

Numbers don't apply
When we're in wild like lions
It's gone on long enough
Nothing's adding up with science
