I knew one day
You would come for me just had to wait and see
As strange as it seems
I could picture you inside all of my dreams

In the back of my mind
I could picture you though I was blind
In the back of my mind
I knew that it was you that I would find

In a way I always knew

It'd be you
come to my rescue

First day we met
It was strange because I knew I'd seen your face
Somewhere

How do you tell a stranger that its their face in your
Dreams at night

That you think she fell from heaven up above
She's Mrs. right
