When I first Met you never dreamt I'd get to see you  
every day (or even talk with you)

It didn't take long for your face to show up in all of my  
dreams (I never want them to leave)

(pre chorus)  
I can stop my fits  
I think that I've found it  
This has to be legit

My world was all askew  
Finally something true  
Today my life begins anew

(chorus)

I wanna be living every day for all eternity  
With you by my side

The chance to be giving  
All of my heart and every single part  
Of me...to you

Just want to hold you  
In my arms forever  
Never let you go (I wish time would just stand still)

(pre chorus)  
(chorus)  
Solo  
(chorus)
