You head home  
If you like  
I'll stay here  
Check if he's alright  
He's got his head screwed on  
And he's still going strong  
As he cracks a smile  
and he tries to tell me what went wrong...

Silence sweeps us off our feet  
The violence, oh, the violence

It takes two

To get bruised  
But looking at that shiner I would say  
There were a good few  
And his friends have "flew"  
'Cause they were bugaloo  
Red and blue

And tell El to wait  
Until we get him home again  
And let's get you right  
And we'll soothe your wounds  
Once we get you home again  
Let's make this right
