"My Side"

Visit "[My Side](#)" on MotoLyrics.com

its your smile that fuels my fire
its your eyes that guard my heart
sitting home alone with you dear,
has never made it so clear
this is where i wanna start

i know, were gonna have to take it slow
I know, we got a long way to go

If you think that i am scared
if you think that i will get us there
if you think that i am afraid to die
well darling im alright cause i
have you by my side

yesterday i saw the rain fall
with the sun beneath the trees
if only i could catch a lighthouse
in the dark ill find a way out
cause its you i need to see

i know, were gonna have to take it slow
I know, we got a long way to go

If you think that i am scared
if you think that i will get us there
if you think that i am afraid to die
well darling im alright when i
have you by my side

i know, were gonna have to take it slow
I know, we got a long way to go

If you think that i am scared
if you think that i will get us there
if you think that i am afraid to die
darling im alright cause i
have you by my side
