I can't forget you, I can't deny

If I surrendered  
You hold me never let go  
Your love's a memory  
Moving as one  
My heart's a secret  
Under your tongue  
Crying forever  
Deep in your eyes

Always  
Fragments of you and I  
They must fly  
Into the tail light  
Under the truth  
But everything's new for you

And I would die a thousand deaths  
But to defend your happiness, my love  
Yours is like a wave upon an open shore  
Everytime you fall I only want you more  
If I've chosen the suffering of the heart, I know  
Our love's a teardrop sent from the sky

Life was a shadow  
Until I knew you  
It's sorrow's a silent  
Crying for you  
I stand defenseless  
Deep in your eyes

Somewhere  
Here in your love  
I'm alive when you want  
Everything changes  
Everything's new  
Baby I'm new for you
