There are so many cold steps between us  
But still I can almost hear you breathe  
When I look at us in our space hero suits  
I can't help but think of us flying

Lift me up a couple of inches, I can lift you  
Then we can both fly above the ground  
Until one of us lets go  
Please don't, please don't  
Please don't let go

I wonder if the sun cast us  
We may when we were young  
Still this may be our way  
Let's take in then with it

But if they do exist  
I think that we have found  
We have found our place

If you lift me up a couple of inches  
I can lift you  
Then we can both fly above the ground  
Until one of us lets go  
Please don't, please don't  
Please don't let go

I don't know if that will do  
I think you have to try some more  
Keep on lifting so the floor can't hit us

If you lift me up a couple of inches  
I can lift you  
Then we can both fly above the ground  
Until one of us lets go  
Please don't, please don't  
Please don't let go

If you lift me up a couple of inches  
I can lift you  
Then we can both fly above the ground

Until one of us lets go  
Please don't  
Please don't let go

If you lift me up a couple of inches  
I can lift you  
Then we can both fly above the ground  
Until one of us lets go  
Please don't, please don't  
Please don't let go

If you lift me up a couple of inches  
I can lift you  
Then we can both fly above the ground  
Until one of us lets go  
Please don't, please don't  
Please don't let go

If you lift me up a couple of inches  
I can lift you  
Then we can both fly above the ground  
Until one of us lets go  
Please don't, please don't  
Please don't let go

If you lift me up a couple of inches  
I can lift you  
Then we can both fly above the ground  
Until one of us lets go  
Please don't  
Please don't let go
