Press your foot down, like I told you
See the houses, rush on by
Reach out your hand, touch my arm and
Let me breath you, as you cry

I can hardly wait
Hope we wont be late
And you know its time
Just ignore all signs

The goal is, to get there
Without fear, in high speed
We dance through, the darkness

We won't stop, 'til we're stopped

Suck my thumb and, feel my finger
as it wipes your, tears away
Watch the concrete, come on closer
Marks of us will, always stay
Face is aged by fear Pass along the weir
And we wont grow old Corpse look fine when cold

The goal is, to get there
Without fear, in high speed
We dance through, the darkness
We won't stop, 'til we're stopped
