Baby, don't make a fool of me, no
They all say, they all say, they all say
I'm too nice for you gasoline, ooh

But what do they know, what do they know
what do they know? (know, know)
I never felt this before, felt this before
felt this before. (fore)
I keep a stash on the low, stash on the low
when you get home. (love, love)
You already know, already know, already know! (know)

It's the summertime
What I look like paying attention to what people say
It's to hot, for all of that, all off that, all of that, all of
that, ohh
I'd rather listen to you, anyway

So don't say a word about my baby, baby
don't say a word about my baby, baby
don't say a word about my baby, baby
don't say a word about my baby, baby
don't say a word about my baby, baby
don't say a word about my baby, baby
don't say a word about my baby, baby

Cause how I feel today, they can't that away
I bet you none of them have felt the way I do right now
I'm so into to you, that thing inaudible

The sound
of you
is thingering
down
