Did it ever occur to you
You're just a little too hard on yourself
Just a little too hard on yourself baby
(On yourself baby)
You know we live and we die and we've really got
nothing to lose
And I need myself
Before I need anybody else
(You need yourself baby)

Live the life that you have
Cause were all born to die
And you know there's really nothing you can do about
that
(Do about that sugar)
You need to be who you need to be while you can
Cause I know that I know who I am
Long before I know paper in my hand
(You know yourself baby)

Do you want to be free baby?
Do you want to be free?

Did it ever occur to you
Your just a little ahead of yourself
Just a little ahead of yourself people
(Of yourself people)
And of course life is always yours to choose
So live, love, and don't fear the news
When they try to tell you there is nothing you can do
Do what you do baby

Do you want to be free baby?
Do you want to be free?
Do you want to be free baby?
Don't you want to be free?
Do you want to be free baby?
Do you want to be free?
