

AC**"Get It Together"**Visit "[Get It Together](#)" on MotoLyrics.com

I've been misbehaving, you've been misbehaving
Precious time's been wasted
And the question that we're faced with is
Should we be together, and just let it go forever
Without investing every problem, solve them
In front of our family we are, perfect
In front of our friends we are, so perfect
But when we get alone, we just can't get along
What the hell is our problem?
What can we do baby, baby, the pain
, it's like we know this love for real
Get it together, we need to get it together, yeah
Get it together, get it together, get it together, yea

I say that it's you, you say that it's me
Back and forth we go all we do is disagree
We started off so steady but then we lost control
How get it, you remember how we ended on this road
In front of our family we are, perfect
In front of our friends we are, so perfect
But when we get alone, we just can't get along
What the hell is our problem?
What can we do baby, to make the pain
, it's like we know this love's for real
Get it together, we need to get it together, yeah
Get it together, get it together, get it together, yea

I don't wanna go , this way, I know that it's , baby
It's gonna be the last time, ,it's working my brain girl
Cause if it's over, let's say it's over
Why should we hold on any longer
But if we give up now, I can imagine how
Believe we'll not say
What can we do baby, to make the pain
, it's like we know this love's for real
Get it together, we need to get it together, yeah
Get it together, get it together, get it together, yea.
