I'm in a rage, you better leave me alone
Alone in my cage, I'm never coming home
Got me on a leash, got me on a string
I got to the point where I don't feel anything

That's... When... I... snap

Suck it up, gonna make you suck it up
You really fuck it up
Gonna make you suck it up
I'll never be the same
And I have you all to blame
Gonna make you give it up
Gonna make you suck it up

How I wanted your love and how I wanted your praise
Instead you left me alone, all by myself for days
I wish the day would come when I could make you see

That you need to put me out of my misery

That's... When... I... Snap

Suck it up, gonna make you suck it up
You really fuck it up
Gonna make you suck it up
I'll never be the same
And I have you all to blame
Gonna make you give it up
Gonna make you suck it up

Suck it up, gonna make you suck it up
You really fucked it up
Gonna make you suck it up
I'll never be the same
And I have you all to blame
Gonna make you give it up
Gonna make you give it up
